

ASX Announcement and Media Release

17 March 2017

A-ZONE DRILLING COMPLETED & MIXY DRILLING COMMENCED

- **Drilling at A-Zone has been completed**
- **Minjar Gold Pty Ltd is sole funding A-Zone drilling and development studies**
- **A-Zone results due over the coming weeks**
- **Drilling to test for additional, near surface mineralisation at Mixy has commenced**

Kalamazoo Resources Limited (**ASX: KZR**) ("**Kalamazoo**") has completed an RC and diamond drilling program for 3,375 metres, on the A-Zone Gold project ("**A-Zone**") at its Snake Well Gold Project (Figure 1). This drilling is part of an overall works program to complete development studies at A-Zone which will be sufficient to prepare a feasibility study for consideration for a decision to mine. Any resultant production would be processed through the **Minjar Gold** processing plant as part of the Ore Purchase Agreement (see ASX announcement dated 31 January, 2017).

The RC drill rig has relocated to the Mixy Project and is aiming to drill approximately 2,000 metres, to test for extensions of the near surface and deeper gold mineralised zones at the Mixy Project, the site of the successful Mixy trial pit completed in early 2016 (Figure 2).

The Board of Kalamazoo are pleased about the completion of drilling at A-Zone and will keep shareholders updated in relation to the A-Zone results when they are available as well as the ongoing further development and exploration programs at Snake Well.
